## Our Mission

*ChildFund exists to help deprived, excluded and vulnerable children have the capacity to improve their lives and the opportunity to become young adults, parents and leaders who bring lasting and positive change in their communities.*

*We promote societies whose individuals and institutions participate in valuing, protecting and advancing the worth and rights of children.*

*We enrich supporters' lives through their support of our cause.*

## What We Do

ChildFund connects children with the people and resources they need to grow up healthy, educated, skilled and, most importantly, safe — at home, at school, in community, online.

ChildFund helps children thrive throughout all the stages of their lives, tailoring our interventions to meet children's evolving needs from infancy through young adulthood.

ChildFund's approach places a special emphasis on protecting children from violence, abuse, exploitation and neglect, because these can shatter any child's positive development in a second.

ChildFund applies a hyper-localized approach by collaborating with local partner organizations to implement programs that help families and communities tackle the root causes of poverty and protect their children's rights.

Because children's well-being depends on their environment, a systems approach guides our initiatives across multiple contexts, from home to school to community and, through policy advocacy, to the national and global levels.
